Sojitz Corporation  
Daiwa House Industry Co., Ltd.

**Sojitz and Daiwa House Industry to Open Serviced Apartments for  
Japanese Families in Indonesia  
Development of “via alma - KOTA DELTAMAS -”**

Sojitz Corporation (“Sojitz”) and Daiwa House Industry Co., Ltd. (“Daiwa House Industry”) established PT. SDI Properties Indonesia in December 2018 for the purpose of developing and operating serviced apartments for Japanese families residing in Deltamas City, the comprehensive urban development project being developed and operated by Sojitz Group in Indonesia. The opening date for the serviced apartments has been set for August 2021.

Deltamas City, where the serviced apartments are located, is situated between Bekasi Regency and Karawang Regency approximately 40 km to the east of Jakarta, Indonesia’s capital. Among Japanese companies who have operations in Indonesia, about half (roughly 900 companies) are located in these two regencies. Cikarang Japanese school (comprising an elementary and middle school; “the Japanese school”), which is affiliated with the Japanese embassy in Indonesia, opened its doors on April 2019 in Deltamas City. Additionally, public-private research on smart cities is ongoing, and because of these and other activities, the area is expected to undergo further growth moving forward.

The two companies have agreed to develop and operate the apartments near the Japanese school with an eye toward providing a comfortable living environment for Japanese expatriates and their families residing in Indonesia. With the construction of the residences being carried out by Daiwa House Industry’s local subsidiary PT. Daiwa Tetra Manunggal Konstruksi, the residences incorporate Japanese home-building specifications such as prefabricated unit bathrooms. Furthermore, the residences will enable children to walk to the adjacent Japanese school via a dedicated footpath, and offer a full range of ancillary facilities and other features to attract tenants (such as the planned Japanese medical clinic, study center for Japanese schoolchildren, Japanese kindergarten, and other amenities).

Through this business, both companies will come together to provide a living environment of Japanese standards in Indonesia that is both safe and secure, in order to elevate the quality of life
