## 1. Analysis of Business Results

(1) Overview of the Six-Month Period Ended September 30, 2016

## Economic Environment

In the six-month period ended September 30, 2016, the global economy displayed signs of a trend toward stable growth as seen in the firm U.S. economy supported by increased consumption and in the recovery of certain emerging economies. Regardless, the outlook remained opaque in light of the potential impacts of the additional interest rate hikes expected to be implemented by the United States and the structural reorganizations taking place in China.

The United States continued to see steady growth on the back of an improved job market, increased consumer spending, and recovered production in the manufacturing industry.

In Europe, although the decision to leave the European Union made by the United Kingdom in June 2016 was expected to cause slowdown in economic growth, demand in the region held firm based on the outlook that the overall impact on the European economy would be limited. Coupled with the benefits of the additional monetary easing measures implemented by the European Central Bank in March 2016, these factors sustained a gentle economic recovery trend.

In China, measures to address the economic deceleration included ongoing industrial restructuring aimed at alleviating the equipment glut as well as infrastructure investment and measures for improving conditions in the housing market. As a result, the pace of the economic deceleration remained slow.

Although there was some disparity between conditions in different countries, steady growth continued in the Asian economy, as seen in how the growth rate slowly stopped decelerating in India and in the improvement of government finances in Indonesia.

Economic growth remained limited in Japan. This situation was largely due to sluggish consumer spending resulted from the lack of wage increases, despite the improved job market, as well as the deterioration of corporate business confidence in the wake of the yen appreciation trend.

Results for the six-month period ended September 30, 2016, are summarized by segment below.

## Automotive

Net sales (JGAAP) decreased $11.8 \%$ year on year, to $¥ 128,208$ million, as the increase in transactions in the Americas automobile dealership businesses was outweighed by the impacts of the yen appreciation and the decline in exports to Europe. Profit for the period (attributable to owners of the Company) decreased $¥ 2,432$ million year on year, to $¥ 1,712$ million, following a decline in share of profit of investments accounted for using the equity method resulted from the absence of a one-time income recorded by an automobile-related subsidiary in the previous equivalent period.

## Aerospace \& IT Business

Net sales (JGAAP) decreased $7.8 \%$ year on year, to $¥ 273,870$ million, because of the adverse impacts of yen appreciation on transactions made as the import sales representative for The Boeing Company. Despite an increase in gross profit, profit for the period (attributable to owners of the Company) decreased $¥ 2,112$ million year on year, to $¥ 756$ million, as a result of impairment losses on Company-owned ships.

## Infrastructure \& Environment Business

Net sales (JGAAP) increased $1.8 \%$ year on year, to $¥ 104,478$ million, due in part to the acquisition of an overseas independent power producer project. Profit for the period (attributable to owners of the Company) increased $¥ 482$ million year on year, to $¥ 1,716$ million, as a result of increase in the profit of domestic solar power generation businesses.

## Energy

This outcome was largely the result of lower gross profit and a decline in share of profit of investments accounted for using the equity method attributable to LNG business and other companies.

## Metals \& Coal

Net sales (JGAAP) decreased 31.0\% year on year, to $¥ 193,094$ million, as a result of a decline in resource prices and lower transaction volumes. Profit for the period (attributable to owners of the Company) decreased $¥ 1,986$ million, to $¥ 1,030$ million. This outcome was largely the result of lower gross profit and a decline in share of profit of investments accounted for using the equity method attributable to steel business and other companies.

Net sales (JGAAP) decreased 12.9\% year on year, to $¥ 281,628$ million, as a result of the foreign exchange impacts of yen appreciation and a downturn in market conditions for chemical and plastic resins. Profit for the period (attributable to owners of the Company) was down $¥ 584$ million year on year, to $¥ 3,737$ million.

## Foods \& Agriculture Business

Profit for the period (attributable to owners of the Company) was up $¥ 1,934$ million, to $¥ 2,214$ million, as a result of an increase in gross profit stemming from strong performance in the apparel OEM business and higher sales of electronic cigarettes as well as the absence of impairment losses recognized on fixed assets in overseas woodchip manufacturing businesses during the previous equivalent period.

## Retail

Net sales (JGAAP) decreased $10.4 \%$, to $¥ 97,201$ million, following a decline in meat transactions.
